

### Microbiological monitoring items

	Pathogens
1	Mouse hepatitis virus
2	Sendai virus
3	Ectromelial virus
4	Lymphocytic choriomeningitis virus
5	Mycoplasma pulmonis
6	Salmonella spp.

If you wish to do animal experiments in the imaging core microscope room, you need to submit a microbiological monitoring document of your mouse/rat breeding room.

The monitoring document should include all the above microbiological monitoring items.
